Spot Now!**

Why should you join our training programme?

Getting the basics right

While it is possible to learn laparoscopic hernia surgery on the job, you can learn it faster by attending our courses. We teach you the basics by online lectures and videos. Our two day hands-on course on specially designed models prepares you for the real life gruel. You can learn the basic and advanced techniques of hernia repair with experts.

A different approach

Our unique feature is the post-course contact programme. Every month we discuss one surgery in great detail over live conference (zoom). This will prepare you for taking the plunge with full preparation for various procedures including endoscopy, laparoscopic and robotic surgeries.

KEEP PACE WITH THE LATEST

"I have improved a lot in my laparoscopic procedures and now performing procedures independently with proper case selection as advised by esteemed faculties" – laparoscopic course delegate.

"Mentorship program has been a game changer for me. From being dependant on other surgeons, I have now moved on to attempting basic as well as difficult cases" – Mentorship program Mentee.

Our Nationally Renowned Faculty

**Dr. Manish Baijal (President
Hernia Society of India)**

**Dr Anubhav Vindal (Professor of
Surgery, MAMC, New Delhi)**

**Dr. Magan Mehrotra Vice President – Hernia
Society of India and Course Director.**
